

Muhamad Nizar

Software Engineer , Web Full stack and Mobile Developer

I am an experienced programmer with a strong focus on web development, backend systems, and mobile applications. My background in development encompasses both backend and frontend technologies, allowing me to contribute effectively across the full development stack. I am particularly enthusiastic about exploring new technologies and opportunities in development to enhance functionality and user experience. My collaborative approach enables me to work seamlessly within teams to deliver innovative solutions.

Software Developer PT Smartin Teknologi Sistem

At PT Smartin Teknologi Sistem, **I thrived as a Full Stack Developer, managing several web development projects** that demanded proficiency in both frontend and backend tasks. My role involved collaborating closely with teams to design and implement solutions that effectively met client requirements and deadlines. My active participation in team discussions and problem-solving sessions contributed to our ability to deliver high-quality outcomes consistently.

I demonstrated strong communication skills and a commitment to teamwork, ensuring smooth project execution and client satisfaction. My adaptability and ability to manage multiple projects simultaneously made me a key contributor to the team, consistently achieving successful project completions in dynamic work environments.

Full Stack Developer Freelance

As a freelance developer, I offer a wide range of services tailored to various client demands, from mid-level to highly complex web and mobile applications. My offerings include:

Web App Consultant: Providing strategic advice and expert guidance to enhance web development projects.

Custom Web Development: Crafting bespoke web solutions that cater to the unique needs of each client, utilizing advanced technologies.

Web Hosting and Maintenance: Delivering secure hosting and meticulous maintenance services to ensure optimal performance and stability of websites.

Academic Support: Assisting students with their academic projects and research, facilitating better learning outcomes.

Technical Problem Solving: Quickly addressing and resolving technical issues to maintain and enhance the functionality of web and mobile applications.

My commitment to excellence and adaptability has enabled me to **deliver high-quality services that meet and often exceed client** expectations, ensuring success in a variety of challenging and evolving project environments.

Frontend Web Developer Kejar.id

During my internship at PT IDS Rumah Pendidikan Indonesia, I was actively involved in developing frontend features using Laravel. Throughout this period, I demonstrated a **strong commitment to learning and improvement**, frequently seeking guidance and effectively communicating with supervisors to ensure project success. Additionally, I assumed the **role of team leader among fellow interns**, showcasing my leadership abilities and collaborative spirit. This experience not only honed my technical skills but also enhanced my interpersonal and leadership qualities, positioning me as a valuable asset in any professional environment.

SMK WIKRAMA BOGOR Field of study

During my time at SMK Wikrama Bogor, I was deeply involved in the Software Engineering program, where I actively participated in various software development activities for the school. I was consistently engaged in **helping my classmates understand complex concepts and collaborate on projects**, enhancing our collective learning experience. My commitment and performance in this field led me to **graduate as one of the top students from my department**.

Skills

- **Full stack Web Development**
 - Proficient in a comprehensive range of technologies essential for frontend and backend web development.
 - **Frontend:** Experienced with JavaScript (including ES6 and jQuery), Vue, React, Adonis, and CSS for dynamic and responsive designs.
 - **Backend:** Skilled in Node.js and PHP frameworks such as Laravel and CodeIgniter, ensuring robust server-side functionality.
 - **Databases:** Proficient in MySQL, Postgres for effective data management and operations.
- **Mobile Development**
 - **Flutter & Kotlin:** Proficient in using Flutter and Kotlin for developing dynamic mobile applications.
 - **API Integration:** Experienced in integrating RESTful APIs to enhance mobile app functionality and interactivity.
 - **Firebase:** Skilled in using Firebase for real-time data handling, authentication, and
